RESTRICTED HANDLING (RH) CABLE PROCESSING STATUS REPORT

Following is progress to date on recommendations submitted by OC/Communications Security Division to enhance the physical security of Restricted Handling Cables.

- a. Recommendation: Customers should pick up and deliver RH messages to a single location, Communications Duty Officer (CDO).

Status: A copy of [] dated 25 April 1986, instructing customers to drop off outgoing cables to the CDO, is attached. (Although a request has been sent to the Fine Arts Commission to determine if a slot can be cut in the door leading into the COC, the CDOs feel that this may not be necessary since the drop-off of outgoing cables has not proved to be as voluminous as expected. A decision concerning the door slot will be made after hearing from the Fine Arts Commission.)

25X1

- b. Recommendation: Approved crosscut shredders should replace burn bags for disposal of unneeded paper copies of RH messages.

Status: Crosscut shredders were ordered on 24 April 1986.

In addition, a slotted box has been installed at the message drop-off and pick-up point outside of 1A53 for a more secure facility for all other outgoing cables.
